

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# Unified Mathematics

By KARPINSKI, BENEDICT and CALHOUN

Embodies the following valuable features:

1. Emphasis on computation. Particular attention is given to significant figures, and to the determination of limits of accuracy.
2. Diagrams appear consistently on cross-section paper; graphical methods are stressed, as well as graphical checks on computation.
3. Practical applications make clear the value of the theoretical mathematical work.
4. Railroad curves are treated in a separate section employing the terminology of the ordinary civil engineer's handbook.
5. Interest and annuity tables appear for the first time in any freshman text. This material is invaluable for the engineer, as well as for the student of business administration.
6. Timing exercises, somewhat similar to standard tests employed in elementary arithmetics, appear for the first time in any college text.

*Cloth. 530 Pages*

## LYMAN AND DARNELL'S Elementary Algebra

By ELMER A. LYMAN, Professor of Mathematics, Michigan State Normal College, Ypsilanti, Mich., and ALBERTUS DARNELL, Head of the Department of Mathematics, Central High School, Detroit, Michigan.

Simplicity and completeness are the distinctive features of this new algebra for secondary schools. It meets the requirements of courses of study in various States and of the College Entrance Examination Board. Unduly puzzling exercises are omitted; nonessentials have been strictly eliminated; easy oral drills help the pupil to understand the subject.

Its problems include applications to geometry, physics, agriculture, commerce, and various interests of everyday life.

# Modern Junior Mathematics

By MARIE GUGLE, *Assistant Superintendent of Schools*, Columbus, Ohio

**M**ODERN JUNIOR MATHEMATICS is a three-book series for seventh, eighth, and ninth grades or for junior high schools. In these books you will find a practical and workable plan for teaching correlated mathematics.

The pupil who has completed the three books of this series, will have acquired a definite idea of the part mathematics plays in the affairs of men in the workaday world. He will have made a limited survey of the complete elementary field. He will have acquired an understanding of many mathematical tools, and masterly skill in the use of a few of them. His knowledge of all of them and their uses will be so broad that whenever later need arises, whether in the drafting room, the shop, the factory, or senior high school, he will know what he needs or how to find it.

---

## AUTHORITATIVE OPINIONS

These books are excellent. I wish I were a boy again to study mathematics with their aid. *A District Superintendent of Schools*, New York City

These texts appeal to me as a distinct contribution of value to this field. The material is live and interesting and valuable. LOUIS C. KARPINSKI, *Associate Professor of Mathematics*, University of Michigan

These books have many new elements which will appear startling to the conservative teacher, but should be accepted by the progressive at once.

“SCHOOL,” New York City

I want to pronounce the verdict of “well done” upon Modern Junior Mathematics. The series is very much to my liking. Your correlation of number and space in the second book is unique. PROFESSOR OF MATHEMATICS, A Well-known Normal School

Recently approved by the California State Board of Education  
and by the North Carolina State Text Book Commission

**Before adopting a general mathematics text examine Modern Junior Mathematics. Send to our nearest office for sample copies**

Books I, II and III: Prices, 80 cents, 90 cents, and \$1.00, respectively

# The American Mathematical Monthly

OFFICIAL ORGAN OF

## The Mathematical Association of America

Is the Only Journal of Collegiate Grade in  
The Mathematical Field in this Country

*Most of its mathematical contributions can be read and understood by those who have not specialized in mathematics beyond the Calculus.*

The Historical Papers include not only those of a research character, but also some in less technical form.

The Questions and Discussions, which are timely and interesting, cover a wide variety of topics.

Surveys of the contents of recent books and periodicals constitute a valuable guide to current mathematical literature.

The Topics in the department of Undergraduate Mathematical Clubs have excited wide interest both in this country and in Great Britain.

The Notes and News cover a wide range of interest and information both in this country and in foreign countries.

The Problems and Solutions hold the attention and activity of a large number of persons who are lovers of mathematics for its own sake.

There are other journals suited to the Secondary field, and there are still others of technical scientific character in the University field: but the MONTHLY is the only journal of Collegiate grade in America suited to the needs of the non-specialist in mathematics.

THE MATHEMATICAL ASSOCIATION OF AMERICA now has over eleven hundred individual and institutional members. There are already nine sections formed, representing twelve different states. The Association has held so far two national meetings per year, one in September and one in December. The sections hold one meeting and some cases two meetings each year. All meetings, both national and sectional, are reported in the Official Journal, and many of the papers presented at these meetings are published in full.

*The slogan of the Association is to include in its membership every teacher of collegiate mathematics in America and to make such membership worth while. Application blanks for membership may be obtained from the Secretary, W. D. Cairns, 27 King Street, Oberlin, Ohio.*

## CONTENTS

The April Meeting of the Kansas Section, by PROFESSOR H. E. JORDAN . . .	283
The April Meeting of the Kentucky Section, by PROFESSOR G. W. SMITH. . .	285
Fifth Annual Meeting of the Ohio Section, by PROFESSOR G. N. ARMSTRONG. . .	287
The April Meeting of the Rocky Mountain Section, by PROFESSOR G. H. LIGHT . . . . .	289
Mathematics and Life Insurance, by MR. P. C. H. PAPPS . . . . .	291
Note on the Roots of the Derivative of a Polynomial, by PROFESSOR W. H. ECHOLS . . . . .	299
QUESTIONS AND DISCUSSIONS: Questions—Replies to Question 34, by PROFESSORS E. SWIFT, A. A. BENNETT and W. A. HURWITZ; Discussions—“Notes on curves whose evolutes are similar curves”, by PROFESSOR G. H. LIGHT; “Functions of half-angles of a triangle”, by PROFESSOR R. D. BOHANNAN; “The use of the vector in analytic geometry”, by PROFESSOR V. C. POOR . . . . .	301
RECENT PUBLICATIONS: Reviews—By PROFESSORS H. M. SHEFFER, R. W. BURGESS, etc.; Notes; Articles in Current Periodicals; American Doctoral Dissertations . . . . .	309
UNDERGRADUATE MATHEMATICS CLUBS: Notes and Suggestions; Club Activities . . . . .	319
PROBLEMS AND SOLUTIONS: “A construction of the regular polygon of seventeen sides”, by MR. L. L. SMITH; “Gauss and the regular polygon of seventeen sides”, by PROFESSOR R. C. ARCHIBALD; Problems for solution—2843–2849; Solutions of problems—416 (algebra), 273 (number theory), 2728, 2745, 2767, 2780, 2781, 2782, 2789 . . . . .	322
NOTES AND NEWS . . . . .	336

---

**EDITORIAL CORRESPONDENCE AND BOOKS FOR REVIEW** should be addressed to the EDITOR-IN-CHIEF, R. C. ARCHIBALD, Brown University, Providence, R. I.

**BUSINESS CORRESPONDENCE** should be addressed to the SECRETARY-TREASURER of the Association, W. D. CAIRNS, 27 King Street, Oberlin, Ohio.

Fifth Summer Meeting of the Association, Chicago, September 6, 1920;

Fifth Annual Meeting, December, 1920

The following are dates of Section meetings of the Association in 1920:

IOWA, Univ. of Iowa, Iowa City, May 1  
KANSAS, State Agricultural College, Manhattan, April 3; Topeka, November

KENTUCKY, Centre College, Danville, April 17

MARYLAND—DISTRICT OF COLUMBIA—VIRGINIA, Goucher College, Baltimore, Md., May 15; Annapolis, Md., December

MINNESOTA, St. Catherine's College, St. Paul, June 5

MISSOURI, Kansas City, November 12–13

OHIO, Ohio State Univ., Columbus, April 2

ROCKY MOUNTAIN, Colorado College, Colorado Springs, April 2

### Missing Numbers of the Monthly

Cash will be paid for certain single numbers as follows, up to a limited number of copies:

February, March, May or September, 1913; September, 1914; February, March, April or June, 1915; February or September, 1918—fifty cents; January, May or September, 1915—seventy-five cents.

Extra copies or volumes of any dates which members wish to contribute will be used to the best advantage of the Association

Address all communications to the Secretary, W. D. Cairns, 27 King Street, Oberlin, Ohio.

# **THE NEW ERA PRINTING COMPANY**

**LANCASTER, PA.**

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

## **Books, Periodicals**

### **Technical and Scientific Publications**

#### **Monographs, Theses, Catalogues**

#### **Announcements, Reports, etc.**

#### **All Kinds of Commercial Work**

*(Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.)*

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

# A NEW MATHEMATICS TEXT BY WEBBER

---

(Published May 6, 1920)

## Elementary Applied Mathematics

### *A Practical Course for General Students*

By W. PAUL WEBBER, Ph.D., Professor of Mathematics,  
University of Pittsburgh.

This valuable new text-book presupposes a knowledge of only elementary algebra and geometry on the part of the student.

**Practical** mathematics which the student will find of use in the everyday affairs of life is given.

115 pages, 5¼ by 8. 23 figures  
\$1.25 postpaid

---

## COMING--A NEW TRADE MATHEMATICS FOR VOCATIONAL SCHOOLS

(Ready early in September)

### Practical Trade Mathematics

By JAMES A. MOYER, formerly in charge of Division of Engineering Calculations, General Electric Company, and CHARLES H. SAMPSON, B.S., Head of Technical and Mathematical Departments, Huntington School, Boston, Mass.

For students specializing in the various trades. The methods of treatment holds the student's interest,—but above all—**it is practical.**
